

VERNO
HOUSE

THE HOTEL

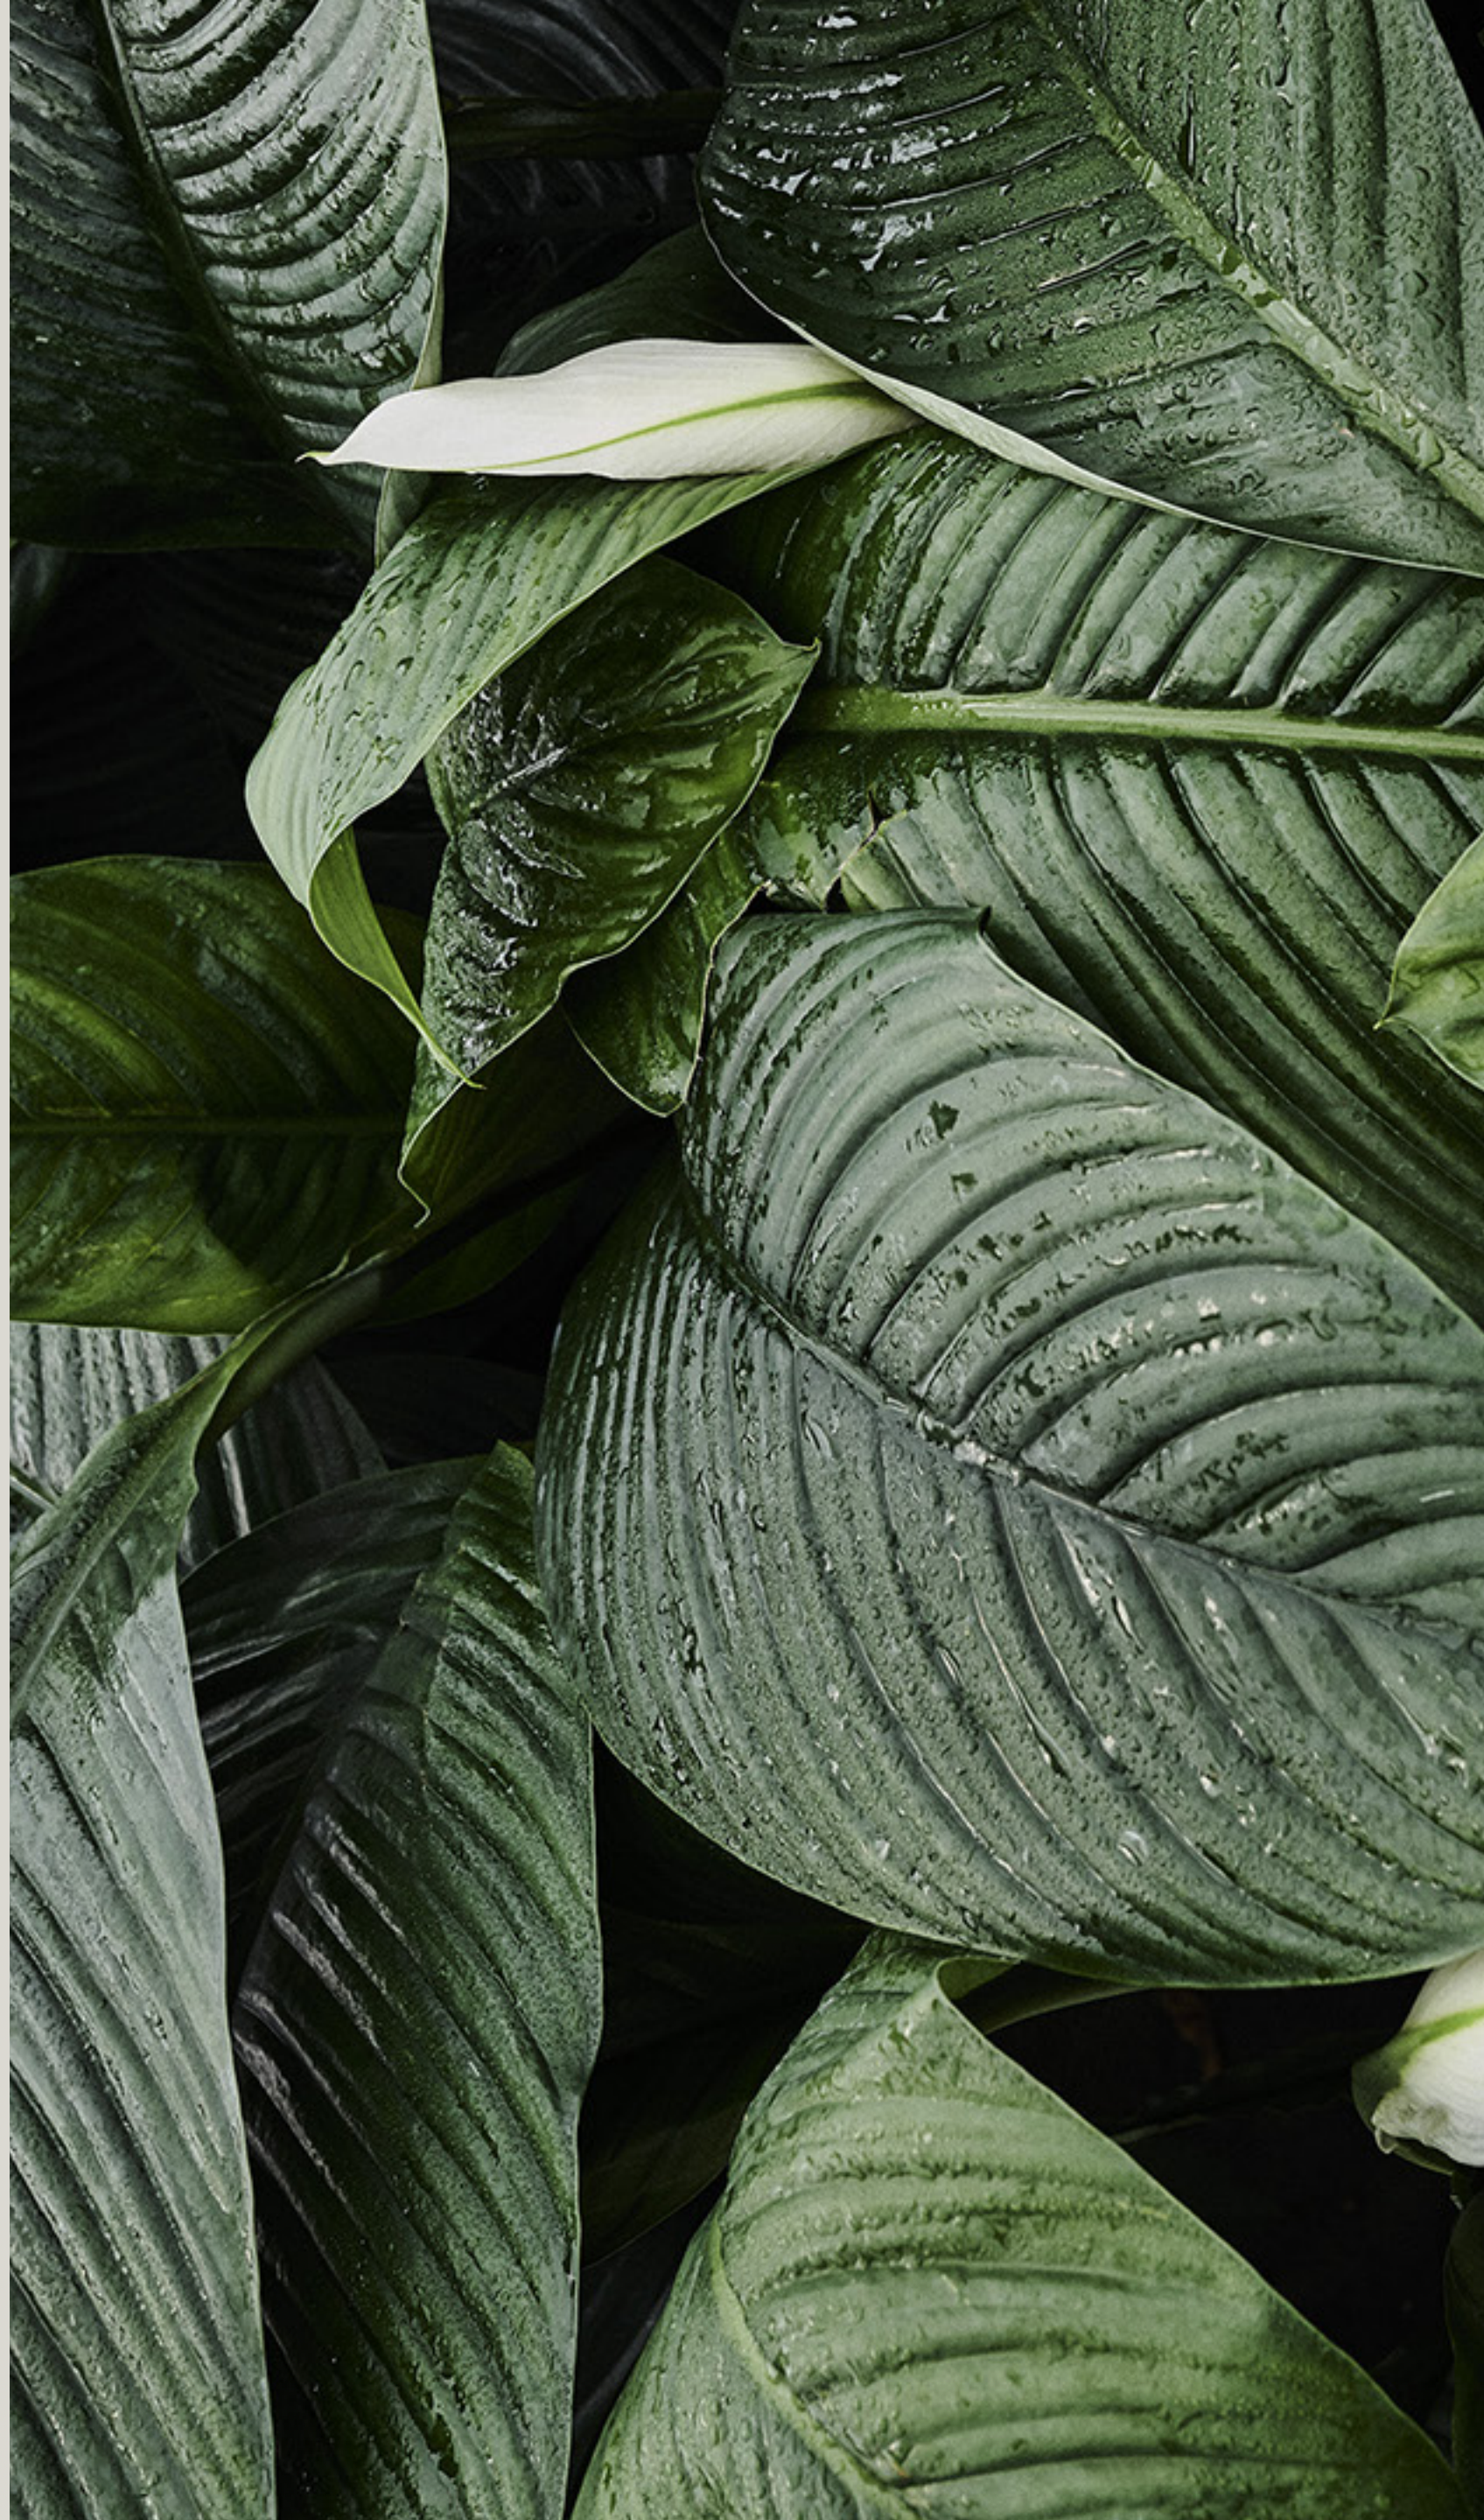

Located in the vicinity of Szabadság tér in Október 6. utca, the building of Verno House has played an essential role in the everyday life of the area since the 1800s.

The building, which previously functioned as a tenement and a hotel, opened its doors again on December 15, 2022 under the name of Verno House. In order to be represented in the international market Verno House will

join the member hotels of IHG Hotels & Resorts, Vignette Collection within the framework of a franchise agreement.

The vibrant streets of the city centre, the main attractions of Budapest and the promenade with plane trees at Szabadság tér are all walking distance from the hotel, thus, its central location makes the hotel a perfect destination for the visitors.

URBAN JUNGLE CONCEPT

The environment of the building has influenced the concept of Verno House to a great extent: the park and the lively streets of the city centre both inspired the design of the atmosphere in the hotel.

The hotel provides shelter from the “dust” of the city as a true downtown jungle, and it functions as a community space where travellers from all over the world can make friends easily.

The concept recalls the idea born in the 19th-century Budapest, according to which the residents and the visitors of a city can respect all its modern features only if the city also has a calm and natural environment where everybody can take a rest from time to time. Based on this idea, greenery and the connected visual elements play a key role in the hotel as part of the concept.

INTERIOR DESIGN

The spectacular accessories of the hotel contribute to the uniqueness and special atmosphere of Verno House, among which we can find the products of many Hungarian designers.

In order to evoke the atmosphere of the urban jungle, photographs were also placed all around the hotel and the restaurant, which were taken by Zoltán Tombor.

The ceramics to be found in the house include the products by Susu Keramika, Muuto, Ferm Living and Westwood. The furniture is provided by Katona Manufaktúra, Spirit Home and Westwood; while the sophisticated and high-quality textiles are provided by the design studio of JAB Anstoetz.

ROOMS AND SERVICES

The hotel places the focus on relaxation and recreation: after exploring the city, the visitors can return and stay within the walls of the hotel where they can take a rest by using the services before they hit the road again.

In order to fully relax Verno House awaits guests, with a hot water bath, Turkish steam bath and Finnish sauna available in the spa unit. For fans of active recreation, a gym is also available to the guests.

FLAVA KITCHEN & MORE

The restaurant is based on a sharing concept, offering international dishes, hereby providing the opportunity even for a larger group to choose from the dishes easily. The menu includes specialties of almost all cuisines of the world creating fresh and unique courses.

As for the drinks selection the wines include special, continuously changing Hungarian and international wines, while the cocktails reflect the jungle feeling of Flava and Verno House.
